

Kauai North Shore Lions Club
Golf Tournament
August 29, 2009

Handicaps were determined in the following way:

Individual Handicaps:

- > If handicap index available, handicap = (index x course slope) / 113
- > If handicap known, use that number
- > If neither handicap index or handicap known, then
handicap = avg 18 hole score - 70 (- 73 for women)
- > Maximum handicap = 36
- > Any variation became insignificant when calculating team handicap

Team Handicaps:

Sum of the two individual handicaps multiplied by a reduction factor:

- > 0.125 for 0 - 20
- > 0.175 for 21 - 39
- > 0.225 for 40 - 59
- > 0.275 for 60 and up

Tie Breakers were determined as follows:

- 1st** Compare scores over last 9 holes
- 2nd** Compare scores over last 6 holes
- 3rd** Compare scores over last 3 holes
- 4th** Compare scores for last hole
- 5th** Flip a coin

For net tiebreaker, the prorated handicap was used:

- e.g. a team handicap of 12 for 18 holes is a handicap of
 - 6 for the last 9 holes
 - 4 for the last 6 holes
 - 2 for the last 3 holes
 - 2/3 for the last hole
